The control panel features the AMS logo on the left. It includes two channel sections (ch.a and ch.b) with 6dB and 18dB gain controls, input h/room/regen, and vco depth controls. There are also speed and depth knobs. A central section contains 'norm', 'lock in', and 'chan. a in phase' options. The right side features a 'delay · milliseconds' display with 'a', 'b', and 'c' markers, and a 'vco' section with 'down', 'nudge', and 'up' buttons. On the far right, there are 'pitch a', 'pitch b', 'delay a', and 'delay b' fields, along with 'on/off', 'power', and 'reset' buttons.

model dmX15-80 S: computer controlled stereo digital delay : advanced music systems: burnley, england
